## Teaching

Since the outset of my academic career, I have been centrally involved in developing an educational field within public health (Columbia University was the first school of public health to offer a degree in history, ethics, and policy). Most of the courses I have taught have been those that I developed, although I have also helped redevelop courses and curricula more broadly. Case-based teaching has been one of my hallmarks, and I note the cases I have developed below as relevant.

### Courses Developed and Taught

#### ***Columbia University***

- History *and* Policy (Not History *of* Policy)
