Statistical Skills

Statistical programs: Stata, SPSS, SAS, R, Mplus

Statistical techniques: Multilevel models (*latent growth curves, within-person fluctuation analysis for daily and longitudinal measures, and nesting groups*), Structural equation modeling (*exploratory and confirmatory factor analysis, path/mediation analysis, and cross-lagged longitudinal analysis*), Event History Analysis (*survival or hazard models*), Actor-Partner Interdependence Model (*APIM: dyadic data analysis*), Computational Methods (*microsimulation*), Causal Inference (*inverse probability weighting, propensity matching, and difference-in-difference models*).
