Conflict and Collaboration

For Better or Worse

Edited by **Catherine Gerard**, Syracuse University, USA and **Louis Kriesberg**, Syracuse University, USA

Series: Routledge Studies in Security and Conflict Management

In this volume, scholars from various academic disciplines join together to examine the overlapping domains of conflict and collaboration studies.

It examines the relationships between ideas and practices in the fields of conflict resolution and collaboration from multiple disciplinary perspectives. The central theme is that conflict and collaboration can be good, bad, or even benign depending on a number of factors. These include the role of power, design of the process itself, skill level and intent of the actors, social contexts, and world views. The book demonstrates that various blends of conflict and collaboration can be more or less constructively effective. It discusses specific cases, analytical methods, and interventions, and emphasizes both developing propositions and reflecting on specific cases and contexts. The book concludes with specific policy recommendations for many sets of actors- those in peacebuilding, social movements, government, and communities- plus students of conflict studies.
